PERSONAL AI BRIEFING DASHBOARD

myOrb

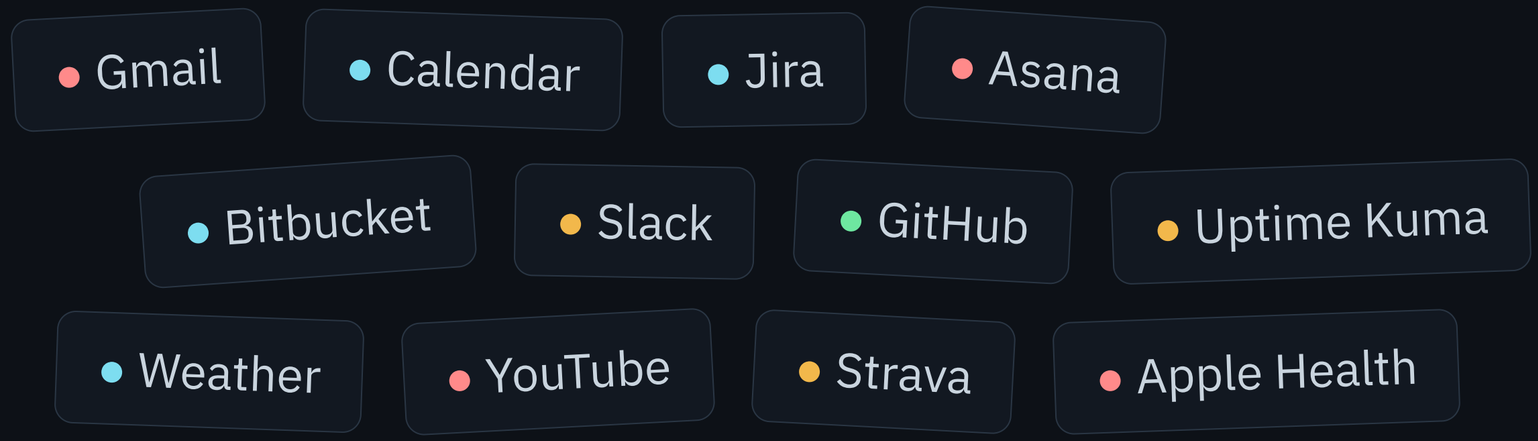

My whole day around one orb: email, meetings, tasks and work, summed up by AI.

Erik Telepovský

WHY I BUILT IT

Every morning started with a dozen tabs

Too many tools

A dozen tabs just to see what today holds.

A brief from AI

Read it all, tell me what matters first.

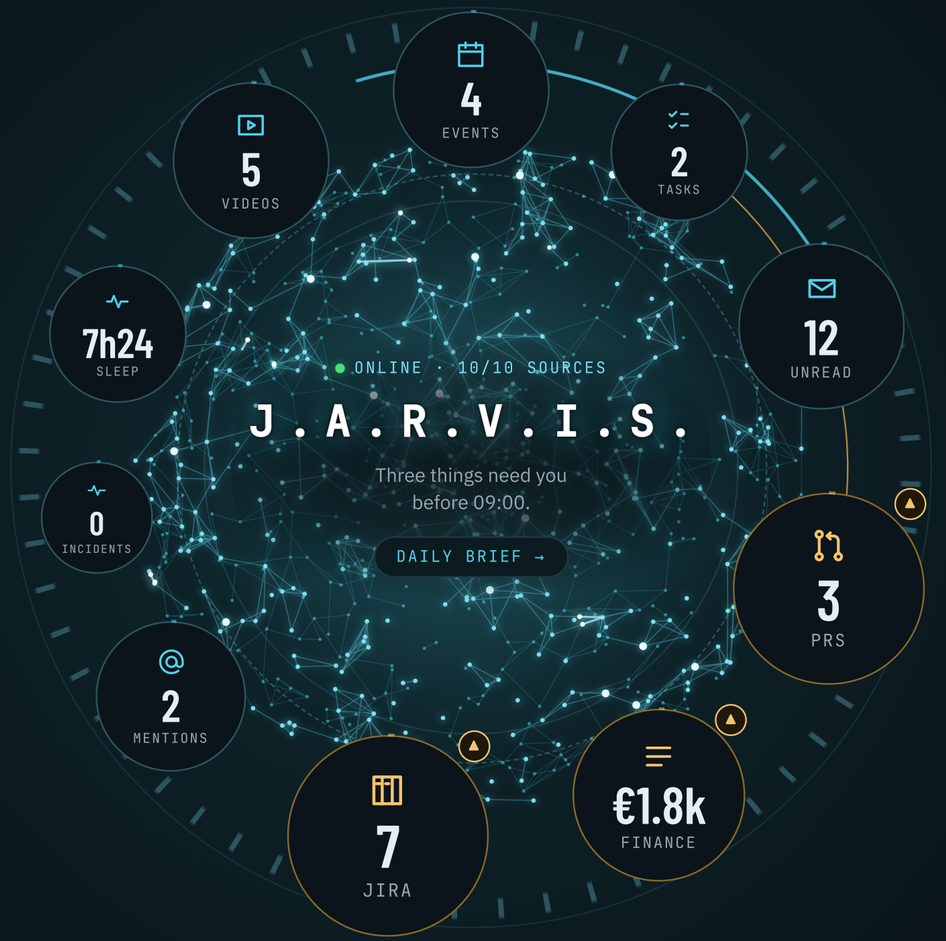

My own J.A.R.V.I.S.

An assistant like Tony Stark’s.

THE HEART OF IT

The orb: my day at a glance

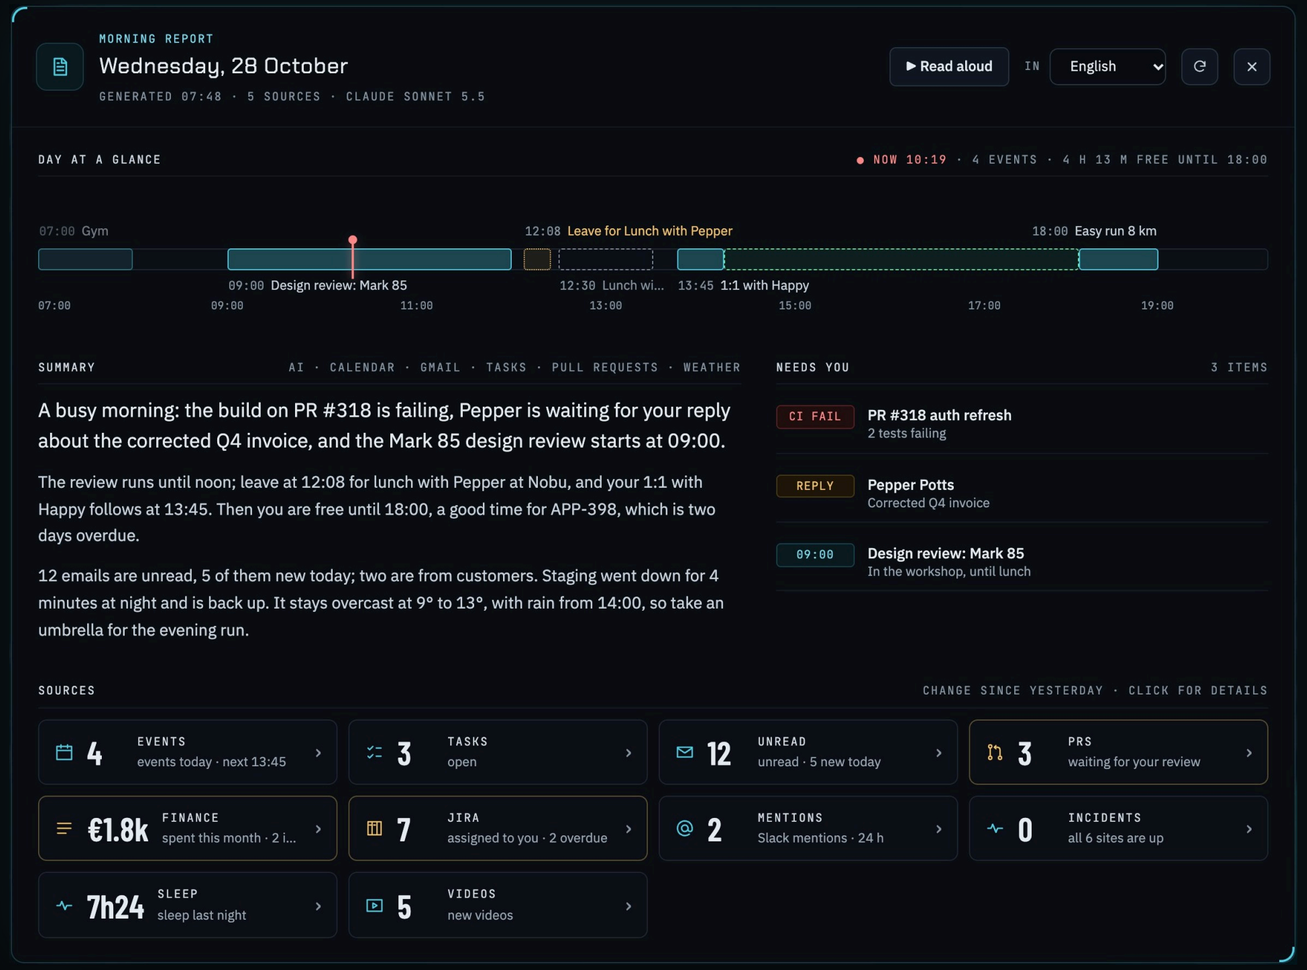

- One number per source around the assistant: meetings, email, tasks, pull requests, Jira…
- Bigger, and marked, when something needs me.
- A click opens what is behind it, with actions: Done, Mark as read, Approve.

EVERY MORNING

The daily brief

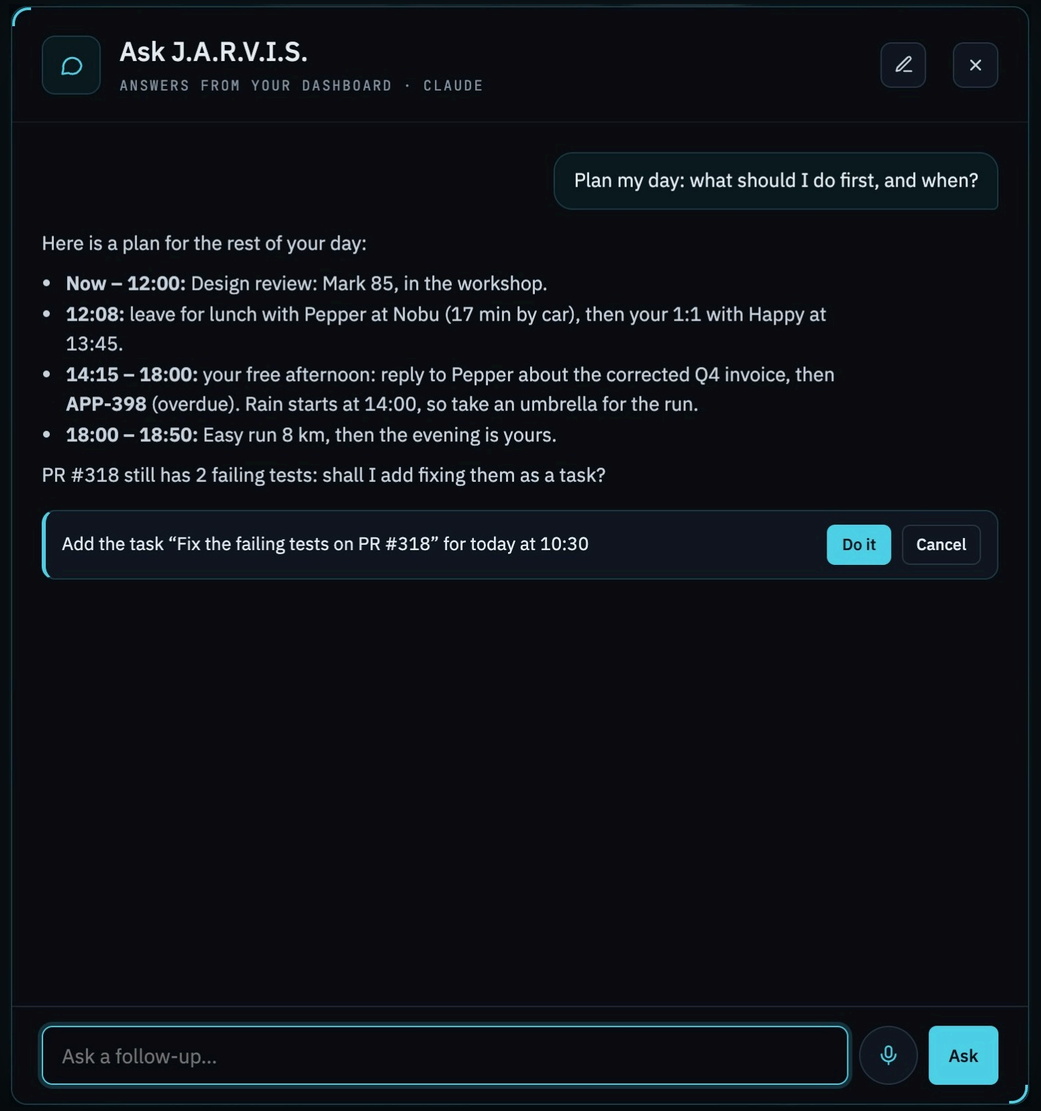

- Written by AI from all my sources, at the time I choose.
- What needs me first, the day at a glance, what changed since yesterday.
- Free blocks for focus, and read aloud while I get ready.

DURING THE DAY

Just ask

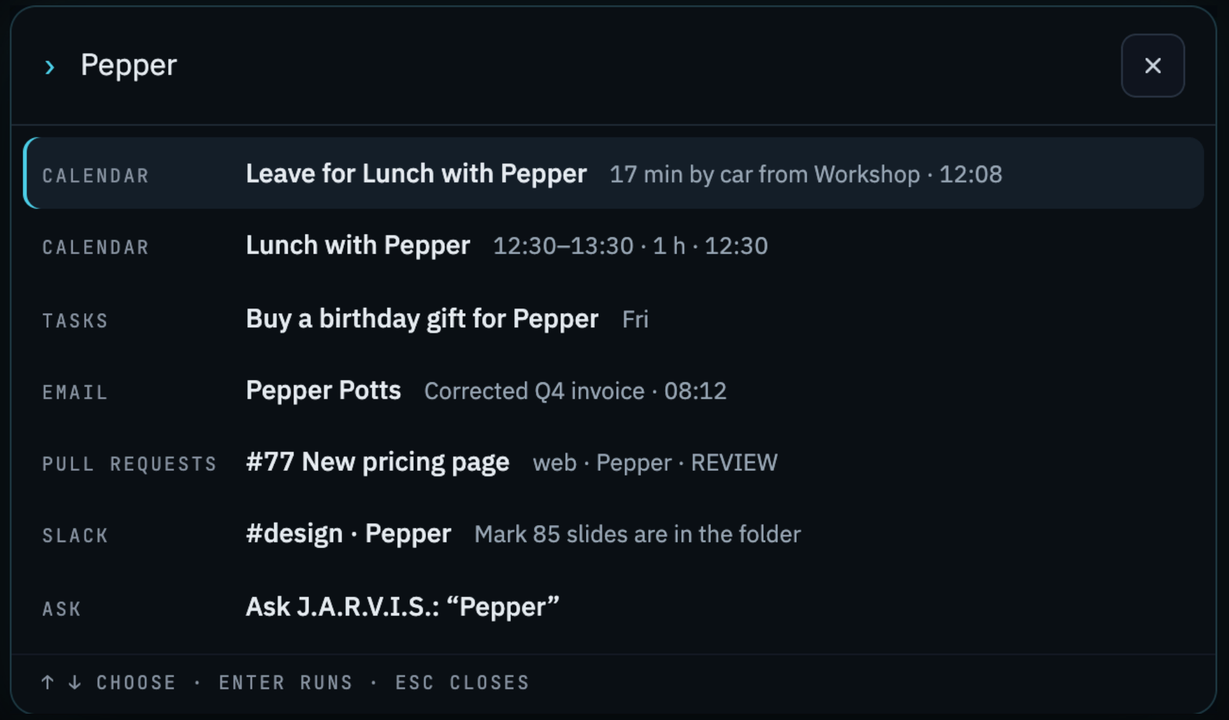

- Typed or spoken questions about my day, answered from the dashboard.
- It acts once I confirm: adds tasks, drafts replies, blocks focus time, approves PRs.
- Most of what it does can be undone.

FROM ANYWHERE

Search everything

- ⌘K or Ctrl+K finds any email, event, task, pull request or issue.
- Enter opens it right in its details.
- Runs commands too, and asks J.A.R.V.I.S. what matches nothing.

INTEGRATIONS

What it connects to

Google

Gmail · Calendar · YouTube · Routes for commutes

Work

GitHub · GitLab · Bitbucket · Jira · Asana · Slack

AI

Claude · OpenAI · Gemini · Mistral · Ollama · LM Studio

Uptime

Website checks every minute · Uptime Kuma

Life

Weather · Apple Health · Strava · built-in tasks

Your own apps

Custom sources and plugins, e.g. invoicing or spending

Self-hosted · Open source · Passkeys · Phone app

github.com/eriktelepovsky/myorb · pypi.org/project/myorb

DEMO

Let’s see it live
